

School of NURSING ONCOLOGY™

UPDATE

A Message From The Co-Chair

Laura S. Wood, RN, MSN, OCN

From birth, through adulthood, and every stop on the way, nurses are there in a patient's time of need. For oncology nurses, that patient's need may be the greatest they face in their lives.

Nursing is a calling to dispense care, to provide comfort, and to heal. In order to maintain the highest level of care for our patients, that calling drives us to first educate ourselves. That's why I am so proud to be part of educational institutions like the **School of Nursing Oncology™**.

Last summer, at the inaugural meeting of **SONO™**, we gathered to discuss the latest trends in oncology care, covering the cancers and malignancies you most commonly encounter. We explored the increasing role of immunotherapy, techniques in toxicity management, methods to improve patient preparedness, and a wealth of supportive care strategies. If you are a nurse starting your career in oncology, **SONO™** provides you with a crash course in all things cancer; for more experienced nurses, **SONO™** is here to update your care standards and provide a leg up for your patients.

I am excited to be one of the co-chairs for the **School of Nursing Oncology™** again this year, but even more so I am excited to attend. I hope you join us in Chicago!

Sincerely,

Laura S. Wood, RN, MSN, OCN
Renal Cancer Research Coordinator
Cleveland Clinic Taussig
Cancer Institute
Cleveland, OH

August 3-4, 2018

Loews Chicago O'Hare Hotel

5300 North River Road, Rosemont, IL 60018

School is back in session! Check out your syllabus:

Essentials in Oncology Nursing: This course provides you with in depth reviews of best practices across multiple cancers, including (but not limited to) breast cancer, gastrointestinal cancers, genitourinary cancers, leukemias, melanoma, and lung cancers

Supportive Care Mastery: From immune-related toxicities to CINV and patient preparedness, this course will teach you how to address a wide range of disease- and treatment-related AEs.

Special Topics in Oncology Care: Updated personalized care approaches, biosimilars, and liquid biopsies have changed the treatment game. This course will provide you a quick update on all things you need to know for the future of cancer care.

A LOOK BACK AT LAST YEAR'S MEETING

Last year at the inaugural assembly of the **School of Nursing Oncology™ (SONO™)** we covered a wide range of topics, cancer types, and methods to address patient concerns. Discussions focused on the management and treatment of the most common forms of cancer, including breast cancer, gastrointestinal cancers, genitourinary cancers, hematologic malignancies, melanoma, and lung cancers. Specific conversations delved into the details of supportive and palliative care strategies, how to address chemotherapy-induced nausea and vomiting (CINV) head-on, as well as an in-depth exploration into the clinical applications and implications of the numerous recent advancements in immunotherapy.

ADDRESSING CHEMOTHERAPY-INDUCED NAUSEA AND VOMITING

Nausea and vomiting are consistently among patients' top concerns when receiving chemotherapy. CINV greatly affects patients' quality of life, during an already difficult time. At last year's assembly, Beth Eaby-Sandy, MSN, CRNP, OCN, co-chair of SONO™, went into detail on the toll CINV can have on your patients. After detailing the neurologic and pathophysiologic underpinning of the nausea/vomiting reflex and how to inhibit it, Eaby-Sandy addressed important risk factors to consider for your patients as well as commonly faced barriers to symptom management. When it comes to educating the patient, "the nurse is always the best person for this," said Eaby-Sandy.

ADHERENCE, COMPLIANCE, AND COMMUNICATION

"Now for one of the things near and dear to all our hearts: adherence, compliance, and communication," started Laura Wood, RN, MSN, OCN, and co-chair of SONO™ before beginning her lecture. Ensuring patients understand and adhere to their prescribed medications at the proper dose and schedule is essential to treatment efficacy. Moreover, Wood stressed the importance of patient and family education in ensuring this adherence. Patient factors, disease/treatment factors, and systemic factors all play a role in reducing adherence and compliance. It's left up to nurses like you to communicate and overcome these barriers to care. Ultimately, Wood concluded with stressing the "five rights" in medication use—the right patient, the right drug, the right time, the right dose, and the right route—are all integral to compliance.

MASTERING MELANOMA AND OTHER MALIGNANCIES

In the morning of the last year's meeting, Grace Cherry, RN, MSN, NP, co-chair of SONO™ led one of the many malignancy-specific discussions. More than an update on the state of the science, Cherry engaged learners in all essential practices in the care of patients with melanoma. Being an oncology nurse that treats melanoma requires the timely identification, diagnosis, and staging of patients, as well as skills in patient counseling strategies for the latest treatment options. "Realize that you have an integral role in increasing awareness and importance in the detection and prevention of skin cancer," concluded Cherry. "Our patients look to us."

REGISTRATION

First Name _____ Middle Initial _____
 Last Name _____ Degree(s) _____
 Physician Fellow PA-C NP Pharmacist Other _____
 Nursing license _____
 Are you employed by a for-profit organization, including biotech, financial, and pharmaceutical, defined as "Industry" by PER®?

Four easy ways to register:

- 1) Go to our website at gotoper.com
- 2) Fill out the registration form and mail it with your payment (checks and credit cards are accepted) to the address below. Please make checks payable to "Physicians' Education Resource, LLC - SONO18."
- 3) Fill out the registration form and fax it to (609) 257-0705 (credit cards only)
- 4) Call (888) 949-0045

Practice Setting:

- Academic medical center/university
- Laboratory/basic research Pharmacy
- Community hospital-based practice
- Government agency
- Community office-based practice
- Pharmaceutical/biotechnology company
- In training (fellow, resident, student)
- Other

What is your principal activity?

- Patient care Clinical research
- Administrative Teaching/training Other

Preferred educational formats:

- Live Online Print

Preferred methods of communication:

- Phone Mail E-mail

Would you like to participate in CME surveys?

- Yes No

How many cancer patients do you treat each month? _____

Years practicing medicine _____

Would you like to enroll in the PER Point System?

- Yes No

Registration fees include continental breakfasts, breaks, receptions and e-syllabus materials.

All payments must be made by a draft on a United States bank.

Physicians' Education Resource®, LLC (PER®) fully complies with the legal requirements of the ADA and the rules and regulations thereof. If any participant in this educational activity is in need of accommodations, please notify us in order to receive service. Please call (609) 378-3701.
